Edwin Additional Credit Claims (ACC)

Additional Credit Claims deal(s) created in Edwin, the European DataWarehouse (ED) platform, are strictly confidential and are viewable only to authorised organisations and users.

Privacy

Required The following organisations and users have permission to access a specific ACC deal:

- Deal creator[1]
- Authoriser(s)[2] of the Data Owner (DO) and of the Data Provider (DP)
- European Central Bank
- Corresponding National Central Bank

Optional Additional permissions to view the deal may be granted to:

- ED user(s) within the DO organisation as defined by the deal creator or the authoriser of the DO organisation
- ED user(s) within the DP organisation as defined by the authoriser of the DP organisation
- ED registered organisation(s)[3] as defined by the deal creator
- ED users of the ED registered organisation as defined by the authoriser of the ED registered organisation

The following table lists the authorisation rights for each category of ED user:

Table 1 – Users authorisation rights

ROLE	Authorisation rights to add:	
	ED user(s)	ED organisation(s)
DO Deal creator	✓*	✓
DO Authoriser(s)	✓*	✗
DP Authoriser(s)	✓*	✗
ED registered organisation Authoriser(s)	✓**	✗

* only registered users within the same ED organisation

** only registered users within the same ED organisation and only if the ED organisation has been granted access by the Deal creator

Deal Creation

Only Data Owners can create a new deal. Click on "*Create New Deal*" to register and create a new ACC deal.

---

[1] Deal creator: ED user that creates the deal in Edwin.
[2] Authoriser: ED user with the authority to grant permission to additional ED registered users and organisations to access the ACC deal. This role is defined during the registration process of the organization.
[3] ED registered organisation: organization that have been registered in Edwin by ED.

Before the final confirmation, specific details can still be modified, if necessary. Please note that the ED Code generated by Edwin after the confirmation is unique and cannot be changed.

Grant access to a specific deal

In the "Create New Deal" page, when the deal creator selects one of the ACC asset classes, the fields "Deal visible to User(s)" and "Deal visible to Organisation(s)" will be made available. The first box can be used to grant access to the ACC deal to individual users that are members of the deal creator's organisation, while the second box can be used to add other ED registered organisations.

It is possible to grant access either at the moment of deal creation or at a later stage by using the "Edit deal" functionality.
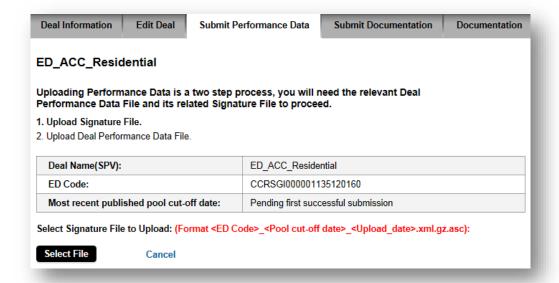

Grant access to 3rd parties' users

When the deal creator grants permission to an ED registered organisation, only the authoriser of this organisation will have access to the ACC deal and will have the right to grant access to other users from his/her organisation.

The "Edit Deal" functionality will be available to the authoriser with "Deal visible to User(s)" as the only editable field. The authoriser may add ED registered users from his/her organisation at his/her own discretion.
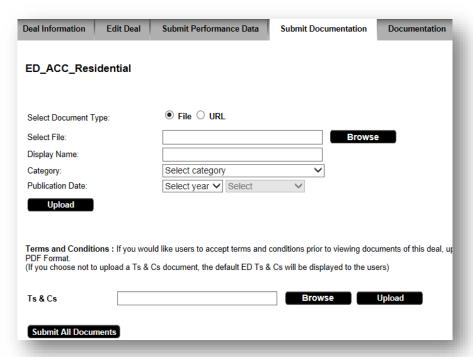

LLD file upload

Only Data Providers can submit LLD to deals on the Edwin application. Please refer to the *"Guidelines to Generate and Submit LLPD Files"* for additional details on how to prepare, compress, digitally sign and upload LLD.

Upload Documentation

In "Submit Documentation", it is possible to upload documents using different formats (e.g. pdf, txt, doc, xlsx) or add a link to a document/webpage. Please refer to the *"Edwin User Guide"* for additional details.

Advanced Search on Edwin

In "Advanced Search", the ACC asset class(es) will be only visible to users with permission to access the ACC deal(s).
